RITTER PEN

RITTER PEN – more than 60 years competence MADE IN GERMANY!

Benefit from more than 60 years of experience in producing writing instruments for promotional needs. Ritter Pen was founded in 1928 and celebrated its 90th anniversary in 2018.

We have been manufacturing writing instruments of the highest quality for more than 60 years in our factory in Brensbach.

From the initial idea and the CAD drawing for our own tool making, to the plastic injection molding and printing - everything is done under one roof.

Production is based completely on our customers' wishes, i.e. manufacturing begins after receipt of the order for CI-compliant ball point pens .

This „Mix & Match" modular system permits an almost limitless variety of models and colors for all writing instruments manufactured in Germany.

You will find a big variety of ball point pens in our Ritter Global line: manufactured either in our factory in China or by reputable specialists in the Far East.

IN JUST A FEW STEPS TO YOUR DESIRED BALL PEN

Whether online with our practical product configurator or in the classic way with our new full line catalog - you can design your own ball point pen in just a few steps:

- Choose your model

- Design your pen in your favourite color within the shown standard color range*.Let your creativity run free and choose the right color combination to match your logo.
  *For special colour requests please contact us for layout proposals.

- The choice of refill is up to you - whether medium line width or soft refills for smooth, comfortable writing, and the option for black or blue ink. All „Made in Germany“ models are available with the types of refill of your choice.

- The logo upload function in our Penbuilder is the final step towards your perfect design - create the appropriate PDF file to get a first impression of your personal Ritter pen!

FINDING NEW WAYS

Ritter Pen's focus is sustainability.

In addition to many ecological measures within the production process, like using green electricity and LED technology, we make use of plastic waste and sprues for our in house recycling : means saving of waste and safeguarding of resources, for a better ecological balance.

We work constantly on increasing the Ecoline with products, made of new, environmental friendly raw materials. Using these bio-based plastics has result in reducing use of conventional plastics and saving resources:

- The new revolutionary, bio based material, consisting of seaweed and PLA for our **ALGO-PEN** – is not only saving resources, but also helps to preserve sea biodiversity. It contains 20 % Sargassum : „born in the ocean".
- The first Ritter Cares Biomaterial, based on cellulose acetate, is completely biodegradable and certified according to DIN EN 13432: 2000-12. The next generation of this material is available now also in colour : **BIO-PEN ID**
- **PLA** is a bio-based material that is obtained from natural raw materials, and also available in colours: **PLANT**
- The next generation in postconsumer recycled material and the perfect way to make use of waste : the rebirth of former shelf parts from **dm**-stores in our new **LIFT RECYCLED**, made of postconsumer recycled Polycarbonate.
- Our post consumer recycled ABS plastic is made of recycled household appliances. The use of this recyclate saves approx. 80% energy compared to the use of conventional plastics : **CREST RECYCLED**
- **ULTRA RECYCLED** large capacity refill is made of 95 % postconsumer recycled Polypropylen from packing waste. This means 80 % less environmental impact and 75 % less CO2 emissions.

The development and processing of recycled and natural materials is a sustainable step towards the future : **For the environment**

RAW MATERIAL ALGAE

Huge amounts of brown algae (Sargassum) in the oceans have become a major problem. Floating in the water, this "big sea of Sargassum" blocks the incidence of light and is killing sea biodiversity. Toxic gases are released at the beaches, as a result of the decomposition of tons of Sargassum under the sun. We use this biomass as raw material:

In the new Ritter **ALGO-PEN**®.

The new, revolutionary, bio based material consists of seaweed and PLA.

#bornintheocean

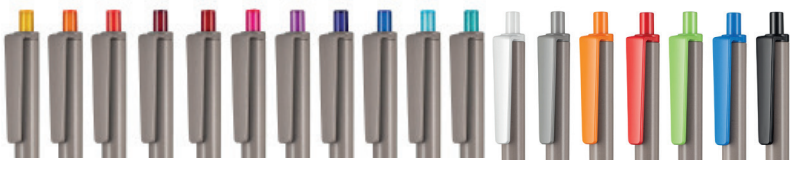

The use of brown algae as a new raw material does not consume any fresh water! The reduction of the algae in the oceans helps to preserve sea biodiversity.

#100%nature

By using this new, bio-based material, we reduce the use of conventional plastics, means saving resources.

#sustainablewriting

Together with our new ULTRA RECYCLED large capacity refill, the **ALGO-PEN**® ensures long lasting, perfect writing performance. The refill is made of post-consumer recycled polypropylene, offering a writing length of up to 6.000 m.

ALGO-PEN® 97500

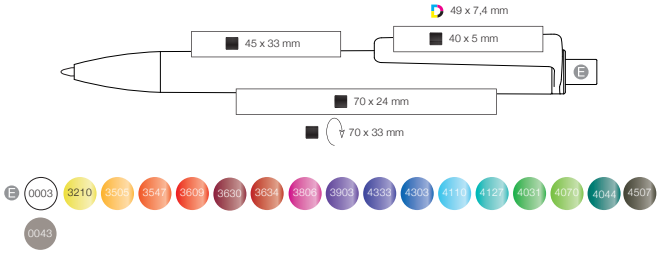

Made in Germany

85% Raw material out of the ocean - consisting of 20% brown algae and PLA

New trend-color ALGO, pushers optionally available in different colors, made of ABS plastic

Document proof, swiss made - large capacity Ultra Recycled refill, writing length: approx. 6.000 m

DIN-certified organic material

ALGO-PEN® 97510

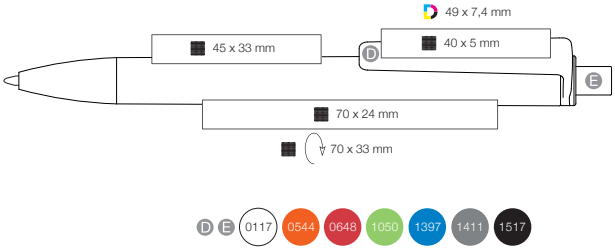

Made in Germany

85% Raw material out of the ocean - consisting of 20% brown algae and PLA

Barrel and tip in trend-color ALGO, Clip and pusher made of biobased PLA, available in 7 colors.

Document proof, swiss made - large capacity Ultra Recycled refill, writing length: approx. 6.000 m

DIN-certified organic material

Ritter Global

Available as a set: 3 colors, including white plastic base and transparent slipcase

WHY POLY BAGS?

What is the reason for using poly bags ?

Almost all Ritter pens are packed in polyethylene bags. This type of packaging offers many advantages, especially in terms of sustainability, e.g. compared to paper or cardboard packaging:

Polyethylene (PE) is a very tear-resistant plastic that we use to keep our pens safe and protected. The tensile strength ensures that the packaging is tightly bundled so that the pens are “fixed” to avoid scratches.

PE is a thermoplastic and can be recycled. It consists of 100% carbon and hydrogen and burns to carbon dioxide and water. Polyethylene does NOT contain any plasticizers.

The production of PE does not produce any toxic gases or toxic waste water - even food is packed in polyethylene. Compared to paper, PE can be produced with very low thicknesses, so that approx. 5-7 times less material is used than for paper products.

SALES SUPPORT

PEN PRESENTATION

This semi-transparent plastic folder contains original pens along with virtual concepts using your client's logo. Leave no questions unanswered with this professional presentation designed to your customers specifications.

Dimensions: 50 x 315 x 275 mm

REFILL-BOX Art. Nr. 69.9127

Sample box with a selection of different refills. For the presentation and testing of the most common RITTER-PEN standard and soft refills.

Dimensions: 17 x 17,5 x 2,0 cm

PROMOTION BOX

The new sample box from RITTER PEN, suitable for 5 pens, optionally with display stand („frame") for presentation in a showroom. The sample box always consists of a tray and a fitting slipcase. The tray is made from the innovative material REINPAPIER, made from recycled bio-based paper. The box is available for different models.

Dimensions without frame: 17 x 17.5 x 2.0cm

Dimensions including frame 19.5 x 19.5 x 2,5 cm

3D-BOX ECO-LINE 69.9113

Cardboard sample kit for 24 pens of the ECO-LINE. With carrying handle.

Dimensions: 245 x 229 x 57 mm

DISPLAYSTAND

The eye-catcher in your showroom.
3-sided cardboard floor display with sturdy, rotatable stand holds 81 writing instruments divided into 27 groups of three. So a total of 27 models are presented.
The eye-catcher in your showroom.

Dimensions: 1800 x 470 x 470 mm

PENROLE Art. Nr. 69.9020

Practical sample presentation, easy to use, offers space for 40 writing instruments, divided into 8 groups of 5 ballpoint pens. Can be rolled up to a compact size with a Velcro fastener.

COLOR CHIPS Art. Nr. 69.0010

Color samples of ABS plastic with embossed reference numbers.
A perfect everyday tool.

WOODEN DISPLAY RITTER CARES
Art. Nr. 69009

The perfect presentation for the RITTER CARES series. Wooden display with holders for a total of 30 writing instruments.

Dimensions: 42 x 52 x 25 cm

Refills

Pen refills at RITTER PEN

Depending on the price segment, we offer different standard refills for our pens. Even inexpensive budget refills meet the highest demands! The writing experience is perfect with the new BALANCE FLOW refill system, which will be used in all writing instruments manufactured in Germany:

RITTER-BALANCE FLOW

High-tech, Swiss made refills are used for all ball pens manufactured in Germany. These correspond to the strict Swiss standard, are waterproof and ISO 12757-2 certified. Balance Flow is a fundamental aspect when aligning a refill system for the perfect writing experience. Ritter Pen's BALANCE FLOW refill system is the point of intersection between a soft writing feeling and an optimum writing length with consistent quality. BALANCE FLOW is availble for Jogger, Marathon and Ultra with 1,0 ball. Soft refills with 1,2 mm also available for the lovers of soft, rich writing.

JOGGER-Refill

The most commonly purchased refill in the advertising industry. A million-seller. Perfect writing characteristics and a highly acceptable writing length.

Jogger

ca. 2.000 m*
Tip brass nickel-plated, 1.0 mm TC-ball
ISO 12757-2 / document proof

Jogger Soft

ca. 1.400 m*
Tip brass nickel-plated, 1.2 mm TC-ball
ISO 12757-2 / document proof

MARATHON-Refill

The big sister of the JOGGER refill. With a slightly thicker refill tube, it conveys a touch of exclusivity in addition to the 25% longer writing length.

Marathon

ca. 2.500 m*
Tip brass nickel-plated, 1.0 mm TC-ball
ISO 12757-2 / document proof

Marathon Soft

ca. 1.800 m*
Tip brass nickel-plated, 1.2 mm TC-ball
ISO 12757-2 / document proof

ULTRA-Refill

This refill is a must for anyone who is interested in great value. A large-capacity refill that lives up to its name. Perfect writing characteristics and a writing length three times as long as a conventional x-20 refill quickly get writers' attention. A refill for image building.

Ultra

ca. 6.000 m*
Tip Stainless steel, 1.0 mm TC-ball
ISO 12757-2 / document proof

Ultra Soft

ca. 4.000 m*
Tip Stainless steel, 1.2 mm TC-ball
ISO 12757-2 / document proof

Writing length is not exactly measurable, because of many criterions e. g. tolerances in TC-ball, ball bearing, ink paste, thus different ink flow, quality of paper, writing pressure, climate, TC-ball size, etc. The standard refill for every pen you can find on the according page in catalogue for every model. The additional cost for refill upgrade please find in your pricelist.

ULTRA METAL-Refill

The undisputed superstar among the refills. High-tech processing at its finest. Ultimate writing length and shelf life. Its metallic weight conveys its high quality. A refill for people who don't want to compromise on quality.

Ultra Metal

ca. 8.500 m*
Tip Stainless steel, 1.0 mm TC-ball
ISO 12757-2 / document proof

Ultra Metal Soft

ca. 5.000 m*
Tip Stainless steel 1.2 mm TC-ball
ISO 12757-2 / document proof

ULTA SUPER SOFT-Refill

The Ultra refill is now also available in the Super Soft version with a 1.4 mm ball for an even softer, richer writing feel.

Ultra Super Soft

ca. 3.400 m*
Tip Stainless steel, 1.4 mm TC-ball
ISO 12757-2 /document proof

ULTRA RECYCLED-Refill

The sustainable variant of the Ultra Mine. The lead tube and stopper are made of 95% recycled polypropylene. In Combined with the writing performance of up to 6,000m, a sustainable upgrade for every RITTER PEN.

Ultra Recycled PP

ca. 6.000 m*
Tip Stainless steel, 1.0 mm TC-ball
ISO 12757-2 / document proof

GEL-Refill

The only wet writing refill with near roller characteristics. A more fluid writing feeling is almost impossible. A refill for absolute enthusiasts.

Gel

ca. 600 m*
Tip Stainless steel, 0.7 mm TC-ball
ISO 27668

Mechanical Pencil

DSM 0,5 mm

Mechanical Pencil

x-20 0,5 mm

Stylus / Touch Mine

Budget

ca. 1200 m*
ISO 12757-1
Ritter Global

Budget Metall

ca. 3500 m*
ISO 12757-1
Ritter Global

Budget Slim

ca. 300 m*
ISO 12757-1
Ritter Global

INFORMATION REGARDING THE DIFFERENT METHODS OF ADVERTISING

SCREEN-PRINTING

The required film for screen printing must be applied in the correct direction, for BASIC & VOLUMES color prints with register crosses. Colors will be printed according to your color specifications (Pantone, HKS, RAL). Please consider the following for halftone prints: Screen is halftone 40 (40 lines per centimeter), Halftone is between 20% and 80%

• Despite the optimal matching of all imprinted components, imprints on metal pens are only partially scratch resistant.

PAD-PRINTING

The film must be side inverted. Color specifications (Pantone, HKS, RAL) are required.
Please consider the following for halftone prints: Screen is halftone 48, (48 lines per centimeter), Halftone is between 20% and 80%.

• Minimum line thickness for films (screen- and pad imprint) is +0,15 mm and -0,3 mm.

• Regarding screen- and pad-prints according to color specifications (Pantone, HKS or RAL)on colored barrels, please consider that it might be necessary to print white background (i.e. one additional printing color)

• Despite the optimal matching of all imprinted components, imprints on metal pens are only partially scratch resistant.

AC ETCHING

The required film for screen printing must be applied in the correct direction. The etching on the surface will appear grey/brown depending of the coloration on the underlying material. Variations within one production is possible. Please note that for every 2000 pcs. etchings, we require one film (e.g. for 10,000 pcs. etchings, 5 films are required).

• Please note: Maximum line thickness of texts and logos is 1.2 mm.

LASER ENGRAVING

For laser engraving we need high resoluted files (look at „FILES")

DIGITAL-FOIL

An image is transported on a carrier film. This film is then applied to the barrel of the ballpoint pen using a hot stamping process. The data for creating the slide images should be high-resolution and in CMYK.

• When creating the data, please note the required size for the respective model. For foiling, 3 mm trim is required on the right and left.

HD-FOIL

An image is transported on a carrier film. This process ensures perfect image and adhesive quality. Due to the tooling cost, the minimum quantity is 5,000 pieces.

D DIGITAL-PRINTING

In this procedure, the logo is printed directly on the ballpoint pen. Digital printing is particularly suitable for multi-color logos and color gradients. The colors are converted into CMYK and therefore can differ slightly from the Pantone datas.

FILES

Please provide:

• Vectorfiles: Illustrator CC2015, included texts have to be converted into text paths, in order to avoid problems with the fonts.

• Pixelfiles: Photoshop CS6 (600 dpi min.). The logo size must be 1:1 or larger.
